MEMO TO: Commanding Officer, 86th Fighter Group.

1. Forwarded herewith is a personal note received by the undersigned from General Templer of the 56th Division. The message refers to two (2) missions executed by your group on January 14th in which you attacked enemy positions near the mouth of the GARIGLIANO RIVER in the area east of LINTURNO.
2. I happened to meet General Templer at a conference on January 15th. He was especially enthusiastic about your show, and in addition to saying everything included in his letter, stated that the pilots had pressed home their attacks in a much more determined manner than he had hoped for.
3. I feel that the attitude expressed in the attached letter is typical of the feeling of front line Army units with respect to air participation in the present campaign. The enthusiastic execution of close support missions has produced an amazing interest and appreciation. In many cases, the interest engendered by your close support work has brought about a fuller realization of the extent to which your efforts well beyond the bombline have influenced the battle.
